

# UNITED MTA RACING 4T

## Product Description

Fully synthetic motorcycle oil specifically developed for the stringent lubricating requirements of the ever developing sophisticated modern 4-stroke motorcycle engines especially those used for racing. By adopting a specially selected synthetic base, this motorcycle oil differentiates itself from conventional 4T oils which are simply adapted from Passenger car motor oils (PCMO).

This motorcycle oil is specially formulated to take into account the unique transmission requirements of the much higher engine temperatures. Reinforced with its exclusive synthetic content, it is ideal to be used in a high speed, high temperature engine typically found in today's modern 4 stroke motorcycles and certainly outperforms other conventional 4T oil. It can be used in most 4T engines including Yamaha, Honda, Kawasaki, Suzuki, and Kubota.

## Applications / Benefits

- \* Strong anti-oxidation that extends engine and oil life
- \* Provides correct friction properties required uniquely by the 4T motorcycle
- \* Retards harmful deposit formation on vital engine parts
- \* Protects against rust and corrosion
